Flight route Ronneby - Frankfurt

A scheduled flight route from Blekinge to mainland Europe is within Blekinge's area of interest. This investment is from a corporate and tourism perspective one of the success factors for continued growth and development in the region.

Why Frankfurt?

A survey among companies within the county showed that Frankfurt is the destination with the biggest potential. The airport has good direct flight connections and a wide range of routes to the rest of the world.

The municipalities of Karlskrona and Ronneby has, together with the business community, created a project to get this flight route started. The business community will finance 50% of the investment, which in terms of money is about 7.5 MSEK over a three-year period.

Estimated start date: Autumn/early winter 2020

Available seats: 70-90 passengers

Partner: An alliance (with options for connection flights)

Estimated flight time: Approx. 1h 30 min

Now we need your help to secure the funding.

You can contribute to the development by investing in pre-purchased flight tickets between Ronneby and Frankfurt.

The ticket cost is 2000 kr/one way* and is invoiced accordingly:
50% year 1, 30% year 2, 20% year 3.

**Business tickets are fully rebookable and valid for 3 years.*
